SANGAVI RAMESH

PRODUCT DESIGNER · INTERACTION DESIGN · ENTERPRISE, DATA AND AI EXPERIENCES

postbox.sang@gmail.com · +91 90805 60242 · Hyderabad, India · Available from January 2027

www.sangavir.online · www.linkedin.com/in/sangavi-ramesh-92a868139

EDUCATION

M.Des, Interaction Design, Indian Institute of Technology Hyderabad **2025 to 2027**

CGPA 8.25 · Research: intent communication in conversational AI

B.Arch, Architecture, Chennai Academy of Architecture and Design, Anna University **2022**

79.90% · Best Architecture Thesis Award

Class XII (CBSE), SKNS PMC Vivekananda Vidhyalaya Junior College **2016**

57.60%

Class X (Tamil Nadu State Board), Railway Mixed Higher Secondary School **2014**

86.30%

SUMMARY

Product and interaction designer with 3 years of industry experience and an architecture foundation, designing end to end experiences for enterprise, banking, fintech, healthcare and ad tech platforms. I make complex systems approachable without sacrificing depth: synthesizing user insights, product data, business needs and technical constraints into clear flows, interaction models and design system aligned UI, then carrying them through delivery with product and engineering. Currently an M.Des candidate at IIT Hyderabad, researching how people communicate intent to AI and designing patterns for responsible, transparent AI powered experiences.

3 years industry UX and interaction design across 5 product teams and design studios

60+ heuristic audits and usability evaluations of client products and platforms

15% platform revenue increase from redesigned interactive ad experiences at KappaX

SKILLS

End to end product design Problem framing · Identifying explicit and unspoken needs · User flows · Wireframes · Low to high fidelity prototyping · Detailed specifications · User scenarios · Iteration through delivery

Interaction and visual design Interaction models · End to end journeys · Component behaviour · Micro interactions and haptic feedback · Pixel level visual refinement · Information design

Systems thinking and information architecture Information architecture · Ecosystem mapping · Keeping local decisions coherent across the wider platform · Complex, data rich enterprise workflows and dashboards

Design systems Reusable components and templates · Patterns and interaction models · Design system alignment and contribution

AI powered experience design Responsible, useful AI experiences · Conversational UX · Intent clarification and disambiguation · Communicating assumptions · Transparency and trust · Error recovery · Designing for uncertainty

Research and synthesis User and stakeholder interviews · Contextual inquiry · Field research · Task analysis · Usability testing · Heuristic evaluation · Surveys · Journey mapping · Affinity mapping · Thematic analysis · Card sorting · Competitive and desk research

Accessible and secure experiences Inclusive design · High contrast, glare readable UI · Security and risk aware flows · Edge cases and error states

Collaboration and delivery Partnering with product management and engineering · Evaluating tradeoffs · Communicating design rationale · Specifications and developer handoff · Stakeholder presentation · Workshop facilitation · Mentoring

Domain interest Data products · Analytics · Developer tools · Data integration and transformation experiences · Content design

TOOLS

Design and prototyping Figma (components, variants, auto layout, interactive prototyping) · FigJam · Framer

AI in the design workflow Claude · ChatGPT · Gemini · Microsoft Copilot, used daily for research synthesis, ideation, content and rapid prototyping

Research and collaboration Microsoft 365 (Word, Excel, PowerPoint) · Miro · Notion · Google Workspace

Visual and motion Adobe Illustrator · Photoshop · InDesign · After Effects · Premiere Pro

EXPERIENCE

Product Design Intern, HDFC

10/2026 to 01/2027

Digital Banking · UX Research and Strategy, Usability Testing and Report, UI/UX Recommendations

- Leading UX research for a digital banking experience, uncovering explicit and unspoken user needs and behaviours across core banking tasks.
- Planning and moderating usability studies to evaluate core journeys and locate friction, errors and drop off points.
- Synthesizing evidence into a structured usability report that prioritizes issues by severity and by impact on users and the business.
- Translating insights into a UX strategy and actionable UI/UX recommendations, aligning product and business stakeholders on what to fix first.

Summer Design Intern, Jamoons Digitals

06/2026 to 08/2026

NETS Singapore · Unified Digital Wallet Experience

- Audited Singapore's NETS payment ecosystem, synthesizing user needs, business goals and technical constraints to reframe a fragmented, card centric product into a unified wallet architecture.
- Designed end to end journeys, wireframes and high fidelity UI for a consolidated wallet with Singpass verification, automated top up triggers and shared family sub accounts.
- Designed ring fenced Main, Personal and Linked wallet spaces that balance user control with security and risk constraints, protecting primary bank balances.
- Defined a scalable information architecture and interaction model so local wallet decisions stay coherent across the wider payment ecosystem.

Interaction Designer, KappaX.io

08/2024 to 07/2025

Interactive Advertising Platform · Kappa Framework

- Designed interactive advertising experiences, contributing to a **15% increase in platform revenue** by making user actions clearer and easier to complete.
- Redesigned the core information architecture and interaction flows of the platform's v3 website, using usability audits to resolve navigation and discoverability issues.
- Built and extended a reusable component library and advertising templates across product categories, improving consistency and speeding up design to development delivery.
- Partnered with product and engineering to translate business requirements into interaction patterns and interface structures across the platform.

Associate UX Designer, Lollypop Design Studio

08/2023 to 02/2024

Let'sbuild.healthcare · Healthcare Platform

- Led end to end UX for a healthcare platform, turning complex, multi step medical processes into structured digital workflows and user journeys.
- Facilitated stakeholder discovery workshops to surface explicit and unspoken needs and align business and user requirements.

HDFC ERGO Career Portal · Enterprise Recruitment Platform

- Designed data rich recruiter dashboards, candidate tracking and role matching modules for an enterprise hiring workflow.
- Authored detailed design specifications and structured handoffs to support accurate implementation by engineering teams.

PopShare · Design Community

- Founded a weekly studio wide knowledge sharing programme on research methods, interaction patterns and emerging practice, building a culture of shared learning.

UI/UX Designer, Unicorn Design Studio **12/2022 to 07/2023**

Client UX Audits · Studio Website

- Conducted **60+ heuristic UX audits** for client presentations and business pitches, identifying usability issues and product improvement opportunities.
- Designed the studio's marketing website end to end: information architecture, visual direction, core screens and reusable UI components.
- Applied UX evaluation and design thinking to client pitches, contributing to new business and project acquisition.
- Represented the studio in client discussions, design conversations and podcasts, communicating UX principles and design rationale.

UI/UX Design Intern, Designient School of Design **10/2022 to 12/2022**

Decathlon Website Redesign

- Contributed to a Decathlon website redesign through competitive analysis, identifying usability issues and checkout friction.
- Created digital visual assets aligned with established brand guidelines and applied user centred design to real world redesign exercises.

SELECTED PROJECTS

When Prompts Aren't Enough: Intent Aware AI Interaction **2026**

Conversational UX · HCI · AI Experience Design

- Investigated the gap between what users communicate and what conversational AI interprets: ambiguity, implicit goals, changing intent, corrections and multi step tasks.
- Mapped breakdowns across incomplete requests, follow up questions and contextual dependencies to find opportunities beyond prompt and response interaction.
- Designed interaction patterns for intent clarification, communicating assumptions, confirmation and recovery, making AI behaviour transparent, trustworthy and controllable.

SIFT: A More Human Way to Screen High Volume Applications **2026**

AI in Recruitment · Enterprise UX · Product Design

- Designed an AI assisted screening experience that helps recruiters understand candidate intent, context and fit, rather than relying on keyword matching alone.
- Mapped the high volume screening workflow to identify where volume, bias and missing context lead to poor shortlisting decisions.
- Designed responsible AI flows that keep recruiters in control and support fair, transparent evaluation; delivered end to end flows and high fidelity prototypes in a 72 hour challenge.

Conductor Companion: One Thumb Ticketing on a Moving Bus **2026**

Nielsen Product Design Assignment · Interaction Design · Product Design · Field Research

- Spoke with a BMTC conductor and rode Marathahalli to Hebbal as a paying passenger; task analysis revealed 4 questions behind every ticket and 7 jobs the conductor holds at once, alongside 9 evidence tagged pain points.
- Synthesized findings through affinity mapping, journey mapping, POV and How Might We into 5 design principles, led by one rule: the system remembers and calculates, the conductor confirms.
- Designed a single screen, no navigation ticketing flow from a thumb reach map: predicted stops, one tap fare counters (Full, Shakti, Child, Pass) and slide to print, issuing tickets for 3 passengers in 5 touches against a 4 second goal.

- Built a glare readable, high contrast visual system and a haptic feedback grammar that restores the feel of physical keys, plus a coin change display and a phygital kit of phone, belt printer and coin changer.
- Covered edge cases and error states including offline payments, unconfirmed UPI and printer failure, and closed with a heuristic review, scenario testing, success metrics and a pilot rollout plan.

CoverMitra: Interactive Insurance Ad Experience **2024**

Interaction Design · Information Design

- Investigated information overload and decision friction in static insurance advertising, finding ways to make complex plan information easier to explore and compare.
- Transformed a passive advertisement into an eight stage guided Q&A experience using progressive disclosure, contextual prompts and focused decision points.
- Designed a communication model that surfaces relevant information progressively, reducing cognitive load from awareness to plan exploration.

RESEARCH

Specialization Project, Department of Design, IIT Hyderabad **2026**

Phase 1 · Understanding Intent Communication in Conversational AI

- Investigating how people express intent through conversational interfaces and how AI systems interpret it across language, context and ambiguity.
- Focus: intent expression · underspecified requests · conversational continuity · expectations versus AI interpretation · intent mismatch · mental models · trust, transparency and perceived understanding.

Phase 2 · Designing Intent Aware Interaction for Conversational AI

- Translating research insights into interaction patterns that help conversational AI understand, clarify and respond to users.
- Focus: clarification and disambiguation · communicating assumptions · user and AI feedback loops · context aware interaction · error recovery · explainability · designing for uncertainty.

LEADERSHIP

Head of Events, India HCI Conference, IIT Hyderabad **2026**

Shaping the conference around "Design for Dignity": inclusive, accessible and responsible design.

Head of Design, E Cell, IIT Hyderabad **2025 to Present**

Leading visual and communication design for the entrepreneurship ecosystem with multidisciplinary student teams.

Founder and Branch Representative, PopShare, Lollypop Design Studio **2023 to 2024**

Ran weekly knowledge sharing sessions and organised socio cultural events for employees.

Core Member, Behind the Lens, IIT Hyderabad **2026**

Film making and visual storytelling club.

Coordinator, RDM, IIT Hyderabad **2025 to Present**

Theatre performer in mime and stage; 4th place, Inter IIT Culturals 8.0, IIT Kanpur.

CONFERENCES AND EVENTS

- **Microsoft UX Day**
- **ServDes '25**, Service Design and Innovation Conference

- **India HCI 2026**, attendee and Head of Events

AWARDS AND RECOGNITION

- **Best Architecture Thesis Award**, B.Arch, Anna University (NASA)
- **Jagriti Yatra 2019 Fellow**: fully funded national journey on entrepreneurship and social innovation
- **Indian Army SSB**: reached the Conference stage, SSCW Technical entry

CERTIFICATIONS

- Google UX Design Professional Certificate, Coursera
- Adobe UX Design Certification (83%)
- UI/UX Pro Course, Designient School of Design (3 months)
- M.Des coursework, IIT Hyderabad: User Experience Design, Interaction Design, Design Research, Data and Infographics

BEYOND DESIGN

Bharatanatyam, Performer and Teacher **20+ years**

Teaching since 2018, including at IIT Hyderabad; founded a dance school in 2024 (about 20 students); Natya Mayuri Award, Fine Art Society of Tamil Nadu; Grade 6 examination; disciple of Smt. Kavya Muralidharan.

Bharat Scouts and Guides, Member and Trainer **20+ years**

Winner in 15+ district and state rallies; represented Southern Railway at the International Railway Jamboree; founding member of an NGO; 300+ social awareness programmes; trained young cubs and bulbuls.
